

Summary of service provider complaint report

Albury Wodonga Health

Introduction

Purpose

The purpose of this summary presentation is to showcase key data for complaints to the MHWC and complaints and compliments directly to your service, largely focusing on the 2023-24 reporting year.

This summary outlines a range of complaints and compliments statistics, including who complainants are, what issues are raised, and how the complaints are resolved.

Interpreting the data

Caution should be used when drawing conclusions from relative numbers of complaints reported by services.

High numbers of complaints reported by services may represent effective complaints reporting processes, a positive complaints culture and/or demonstrate high numbers of issues experienced by people who use the service.

Conversely, low numbers of complaints may indicate issues with the recording of complaints or the service's approach to complaints, or a high level of satisfaction with the service.

Complaints represent people's experience, and a sign of a positive complaints culture would be higher numbers of complaints to services and lower number of complaints to the MHWC, reflecting that people feel confident to raise their concerns with the service.

The role of the MHWC

The MHWC collects and analyses complaints data about public mental health services to:

identify key themes
and emerging issues
across the sector

gain insights into the
concerns/experiences of
consumers, families and carers

increase awareness of systemic
issues and improvement
opportunities

understand the **status of**
complaint processes and
reporting across the sector

inform our projects
and recommendations

The MHWC also has a role in system oversight, including monitoring the quality, safety, and performance of the sector.

It is expected that this report will continue to adjust to align to the MHWC's system monitoring and oversight functions over time.
