

2022-2023 MHCC Complaints Sector-wide Overview Report

This report contains an overview of complaints reported by Victorian mental health service providers to the Mental Health Complaints Commissioner (MHCC) from 1 July 2022 to 30 June 2023.

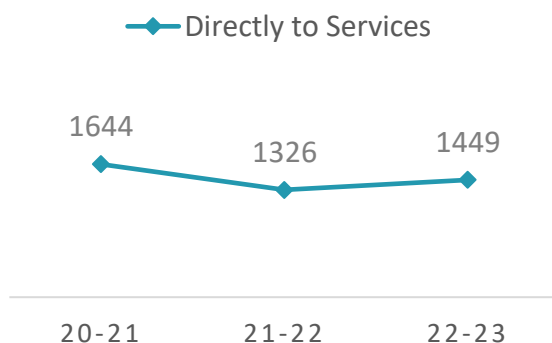

Summary

- Broadly more complaints were made directly to the Services than to the MHCC in 2022-2023, consistent with previous years.
- Consumers continued to make the majority of complaints both to the MHCC and directly to the Services and consistently the majority of complaints were made about services who provide support for Adults.
- Issues related to Treatment, Communication, Conduct & Behaviour and Medication continue to be the most commonly raised in complaints made to both the MHCC and directly to the Services.
- Acknowledgement of the concerns raised in complaints is the highest reported outcome by services in complaints made to the MHCC, where Actions provided to complainants is reported as the most common outcome in complaints made directly to the Services.

How Many Complaints Were Made?
